Linking-galleries User guide

Overview

Linking gallery is a web-based interactive map application which allows user to locate the Bristol Museum's collection of objects that relate to places in Bristol. Bristol Museums host for nearly 2 million objects, and this app has been built for the Bristol Museum and visitors as a reference guide that pulls together information about these artifacts and which place in Bristol they are related to.

Main functionalities

- Object location marker

On starting the map app, a map view of all objects will be presented as being pinned on the map. User can tap on the place pin to learn a place and it's connection with the museum collection.
On clicking, it will pop up a window with the object name and it's description/information.

- Group objects by region

On the top left corner, there is a 'region' button, where users can click to view a list of ward regions.
Since our objects are sorted according to the ward regions in Bristol. User can select to view objects in certain region/regions on the map.
